

Let me tell you how my school is affected by Ohio school funding.....

My school Barrett Urban academy is affected by Ohio school funding because there is not enough money to get materials that we need to be able to get thought each day. The paint is chipping off the walls and the sling is falling in. you just can't imagine if it fall what will fall whit it. Let me keep it real with you this school been 117 years. If you ask me it should have been remolded before the year 2000 even began. If you were new in the neighborhood and you had to send your child in to barrttg. When you first walk in front of the school you just look at the school and think I don't wont my child to go there that's how bad the school look's. It look's like your walking in to the twilight-zone that's how bad the school look's on the out side.

And can I ask why there is that we have about 25 to 30 students in one class and not enough pe, lab tops, book, calculator or art supply. Now let me tell you about the basement. It is so dusty .and all the bugs. The bathroom is were most people go to taek care of there business and I now don't know body want to go in no dusty nasty bathroom .even be 'for you walk in the bathroom the smell gets to your stomach and Make you siek and that's in the girls bathroom. Something else that makes me mad about this school is that there are about 100 kids in the 7^h grade and 15% of the lockers work. Now you see what going on in these building and what you pay your taxes dollar's .and you kids does not have the materials they need to get an education you feel like the government and Ohio school funding don't even care.

Well that's all I have to say for now. But the Ohio school funding need to get it together and together quick
